Academic Projects

Title	:	HealthPlus
Platform	:	Spring Boot,MySQL,JavaScript,ReactJS **Duration** : 1 Month
Description	:	Online booking system that manages healthcare related services with the convenience of BookMyShow. A doctor/clinic service booking system provides its customers the ability to book appointments online. E-appointment system allow the customers to browse through doctors within their region with speciality and experience and ratings based on previous user reviews and book appointments anywhere anytime. It manages all the information about Doctor, Appointment and Booking Number. The appointment booking service should be able to list different cities where its affiliate health practitioners are located. Once the user selects the city, the service should display the practitioners available in that particular city. Once the user selects a speciality, the service should display the qualified doctors/hospitals and the doctor specific available appointment times. The user should be able to choose a doctor at a particular hospital/clinic and book their appointments.

Title	:	**Material Handling Equipment**		
Platform	:	AutoCAD	**Duration :**	3 Months

Description : Considering the increasing price of fuel and electricity we have decided to work without use of electricity and fuel,alternative energy sources like(P.E.). We have to use to save the cost in effective manner.So we have to produce material handling equipment operated by spring, rack and pinion mechanism in that we have decided to movement of jobs from one place to another,so this device eliminates manual material handling and reduced price of product handling by minimizing material handling cost.
